Coltri MCH16 DY High Pressure Air Compressor (Diesel Driven)

The Tech Diesel Coltri Breathable Air Compressor is ideal for intensive professional use and at the same time excellent for transportation. It is equipped with 2 connections for High pressure hoses (from 232 to 330 Bar), a Yanmar diesel engine and the robust MCH 16 Standard pumping unit. The compressor is particularly suitable for diving centers and subsea construction companies that need excellent performance and fast filling times. The robust frame provides excellent protection for the equipment increasing reliability and lifespan.

Specifications

Capacity: 11.5 CFM

Pressure: 0—3300PSI

Compressor Cooling: Air Cooled

Number of Stages: 3

Number of Cylinders: 3

Oil Type:

Motor Drive

Type: Belt Drive

Noise Level: 95 db

Fuel Requirement: Diesel

Dimensions & Weight:

Compressor housed in Safety Frame

Length: 113 cm

Width: 61 cm

Height: 80 cm

Weight: 150 Kg
